

VERTICAL CLIMBING WALL

The vertical wall is a 7.3m 4 person climbing wall which can be climbed by people of various skill and ability due to slight differences between the 4 routes. It takes its shape directly from rocky surfaces which give it a realistic look and feel without being abrasive and can be used alongside the handholds during climbing.

The auto belay system automatically lowers climbers when they let go of the wall and adjusts to each climber's weight to provide a safe ride back to the ground. This method allows for a high throughput of participants within a given time.

The Vertical Climbing Wall is a great centrepiece activity for your event.

DELIVERY SPECIFICATIONS:

Trailer: H: 2.3m W: 2.4m L: 8m
Plus large van (L:6m W:2m H:3m)

OPERATING DIMENSIONS:

H: 7.5m W: 6.5m L: 13m

OTHER:

Unit weight: 2177kg
384ft² (35.7m²) surface area for climbing
4 auto belays
35mph wind rating
