

## **SPIDER MOUNTAIN**

Spider Mountain is a unique climbing attraction for all ages that develops motor skills and gives a complete new experience each time it is attempted. The participants climb upwards through a series of levels of interlaced flexible webbing straps, until reaching the top level and descending back to the bottom via the inflatable slide, which provides a final thrill after the climb.

It is also equipped with the optional 2 person, auto belay vertical wall on the outside of the structure making this a high throughput activity for any event.

Spider Mountain, a great centrepiece activity for your event.
